

Filip Nordhagen  
37 years of age  
Front-end developer  
in progress.

Hi, thank you for checking out my page first and foremost. My name, as you may have concluded is Filip Nordhagen. I am a 37, soon to be 38 year old male that has for the past year started to get some insight in to Design and basic coding in HTML, CSS and JavaScript. Have had allot of fun, but also allot of headaches. This was all brand new to me (pun intended).

In this [portfolio](#) you can see some of my work. I have had allot of different [job experiences](#) in the past, but I have always loved to work with computers. So falling back to old habits, I chose to pursue an education within it's domain.

Also if you want to get in [contact](#) with me, feel free to do so.
